1. Instant Messaging

1.1 Usage Scenario

1.2 Goal

The goal of this program should be to enable simple social features found in any modern day chat features, such as a friends list, adding friends, deleting friends, and of course being able to chat to your friends through a simple gui. Within this chat gui as well, the goal is to be able to play a simple chess game through text, and be able to play this chess game with another person on the user's friends list through the same chat window.

1.3 Features:

- Messaging with History
- Graphics User Interface (GUI)
- Adding and Removing Friends
- Blocking Friends
- Accepting and Rejecting Friend Requests
- User Status
- Unread messages
- Chess Game Integration

2. Installation

2.1 System Requirements

System:	Linux
Disk Space:	128MB free
Ram:	512 MB or more
CPU:	1.2GHz or higher
Internet:	essential for the chat application

2.2 Setup and configuration

To install the chat app, copy (using ~cp) the chat_v 1.0.tar.gz and chat_V1.0_src.tar.gz file from the host to your own Linx.

To type make chat and make test command which can run the chat client

2.3 Uninstalling

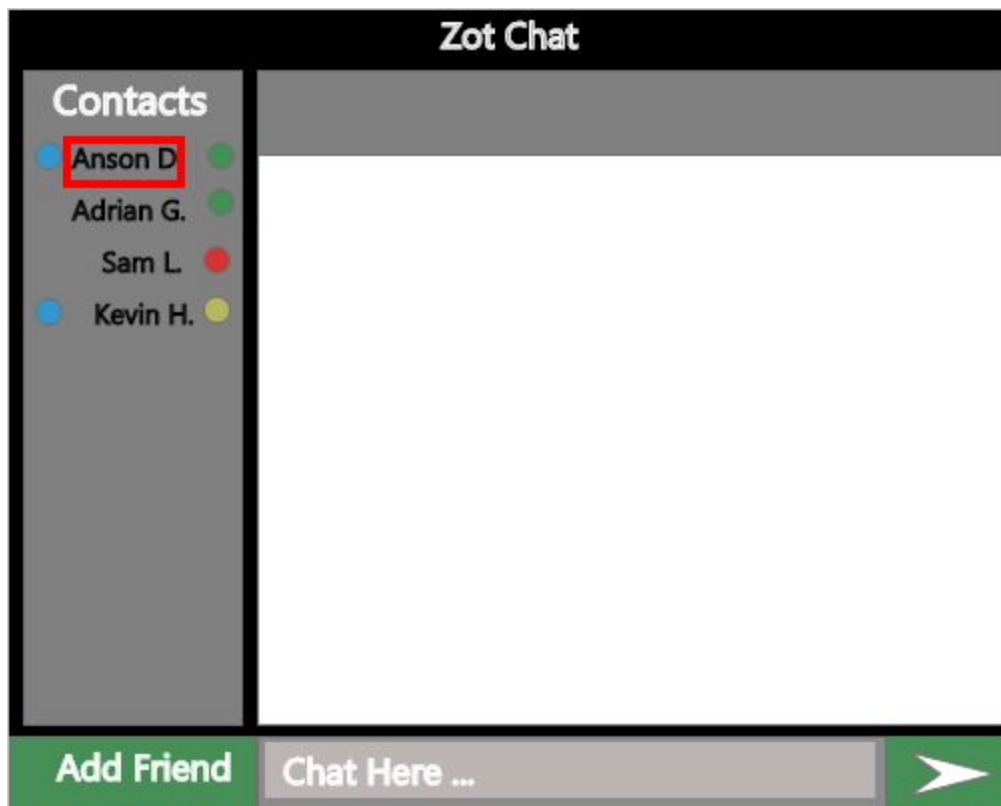

To uninstall the chat app, type:
rm chat_v 1.0.tar.gz chat_V1.0_src.tar.gz
At the file directory

3. Chat Program Functions and Features

3.2 Detailed Description Signing Up and Logging In

Signing Up

Step 1:

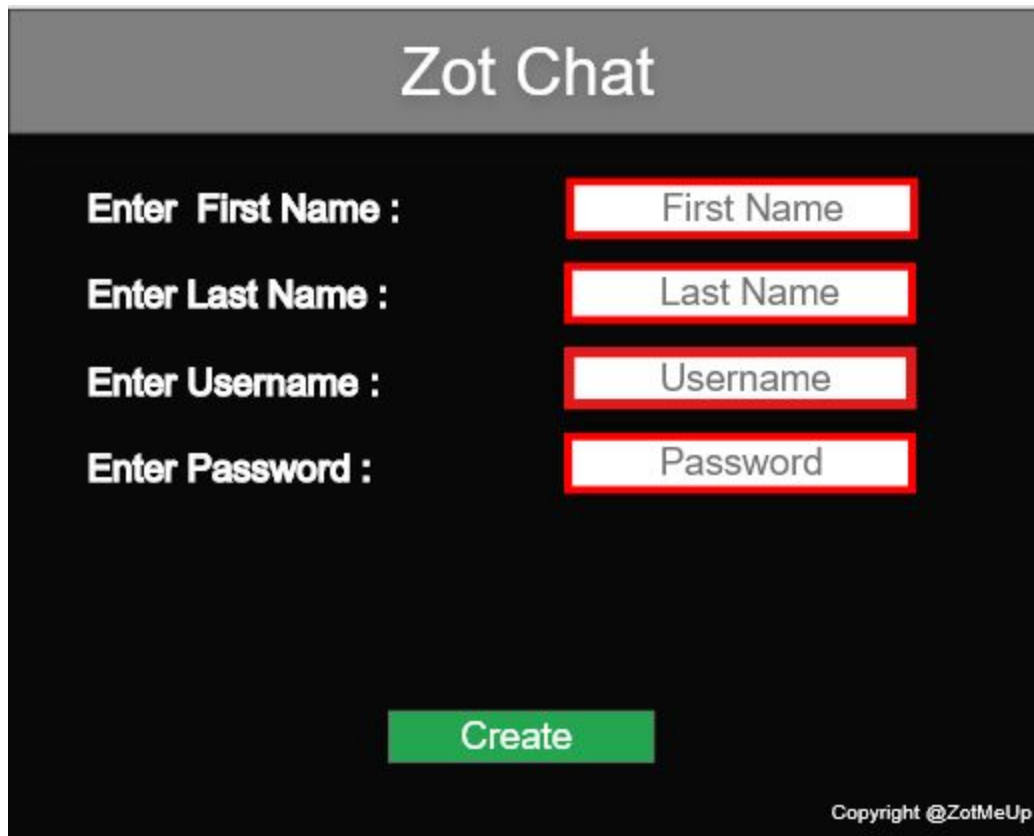

Click on the “Sign Up” box, this will send you to another screen.

The image shows a web interface for 'Zot Chat'. At the top, there is a grey header bar with the text 'Zot Chat' in white. Below this, on a black background, are four white input fields stacked vertically: 'Username', 'Password', 'Login', and 'Sign Up'. The 'Sign Up' button is highlighted with a red border. In the bottom right corner, there is small white text that reads 'Copyright @ZotMeUp'.

Step 2:

Click and provide your credentials in the boxes provided.

The image shows a registration form titled "Zot Chat" with a dark background. It contains four input fields for "First Name", "Last Name", "Username", and "Password", each with a red border. A green "Create" button is at the bottom center. The copyright notice "@ZotMeUp" is in the bottom right corner.

Zot Chat	
Enter First Name :	<input type="text" value="First Name"/>
Enter Last Name :	<input type="text" value="Last Name"/>
Enter Username :	<input type="text" value="Username"/>
Enter Password :	<input type="text" value="Password"/>
<input type="button" value="Create"/>

3.3 Accepting/ Rejecting Friend Requests.

Step 1: A screen will interrupt your window to the “Accepting friend request screen.

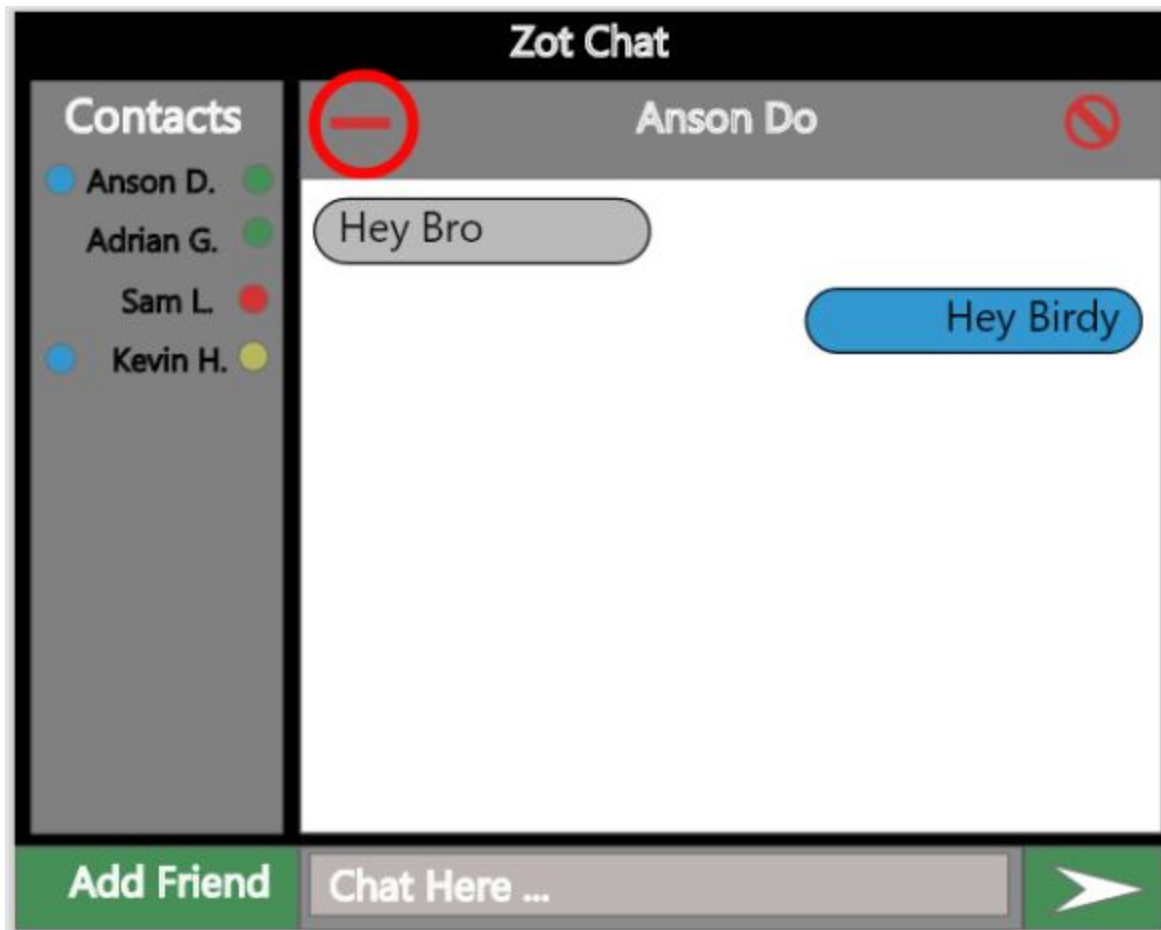

If the request is accepted, the user will be added to your contacts list.
If not, you will be returned to the screen you were previously on.

3.4 Deleting/ Blocking a friend.

Deleting a friend

Step 1: Click the “-” sign in the chat of the person you wish to delete.

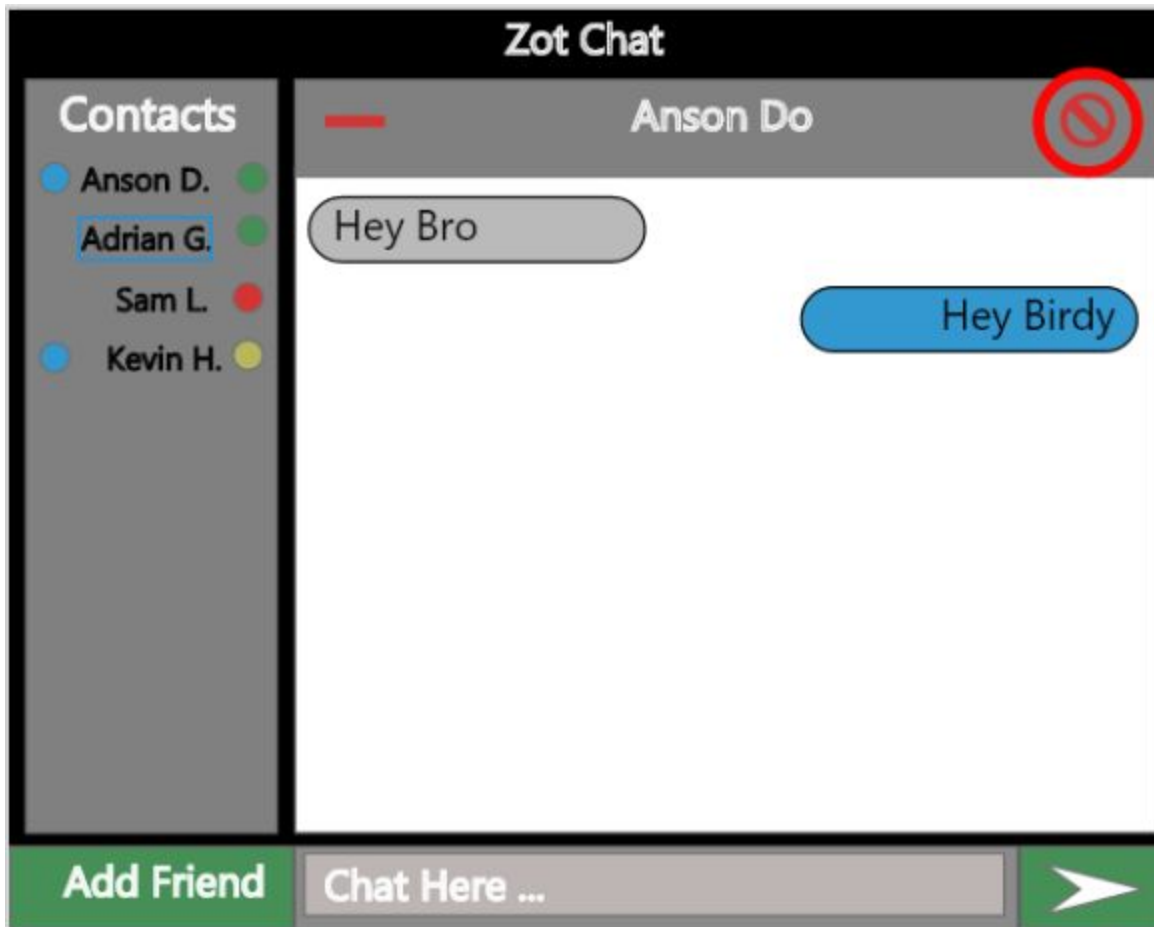

Step 2: A screen will direct you to confirm or deny the request and return you to either the main screen or back to the chat.

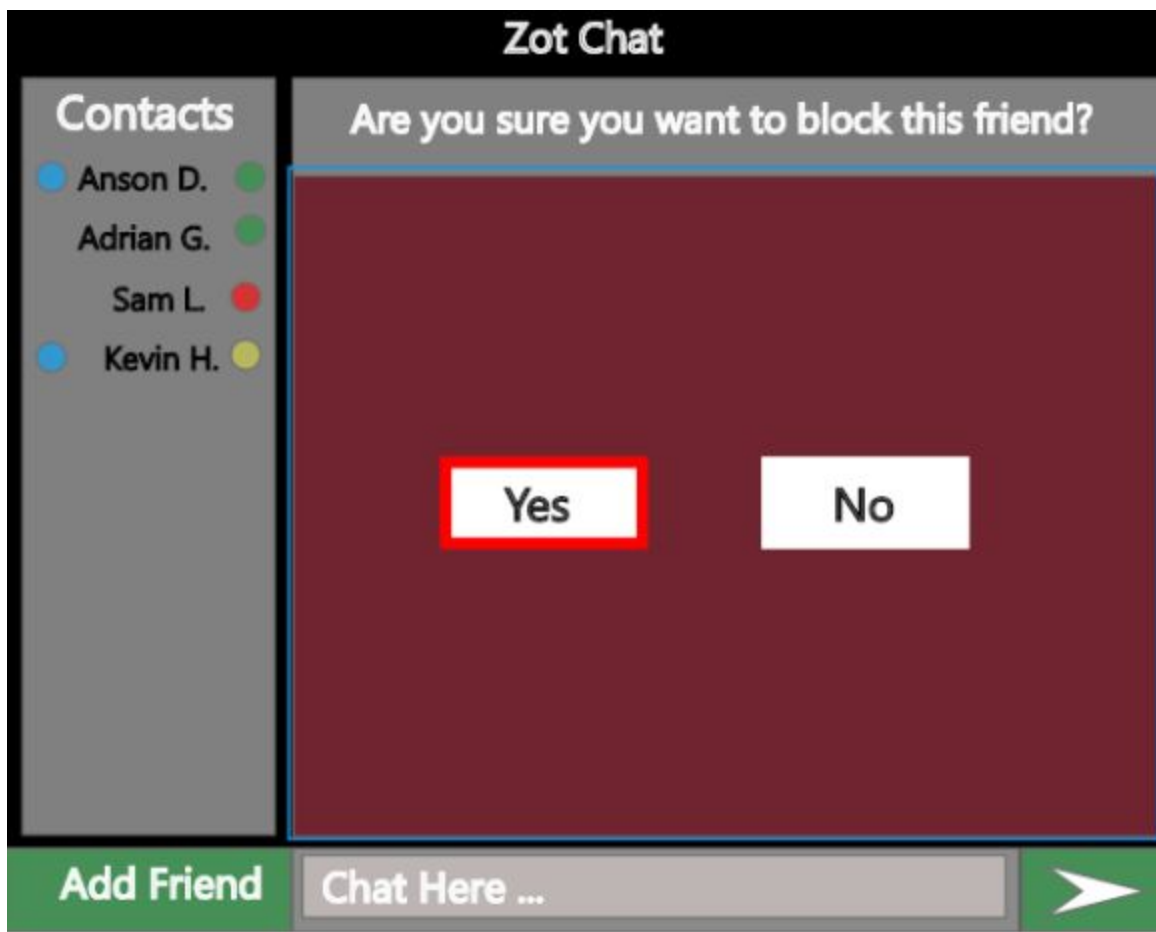

Blocking a friend

Step 1: To block a friend, click the block status next to the name.

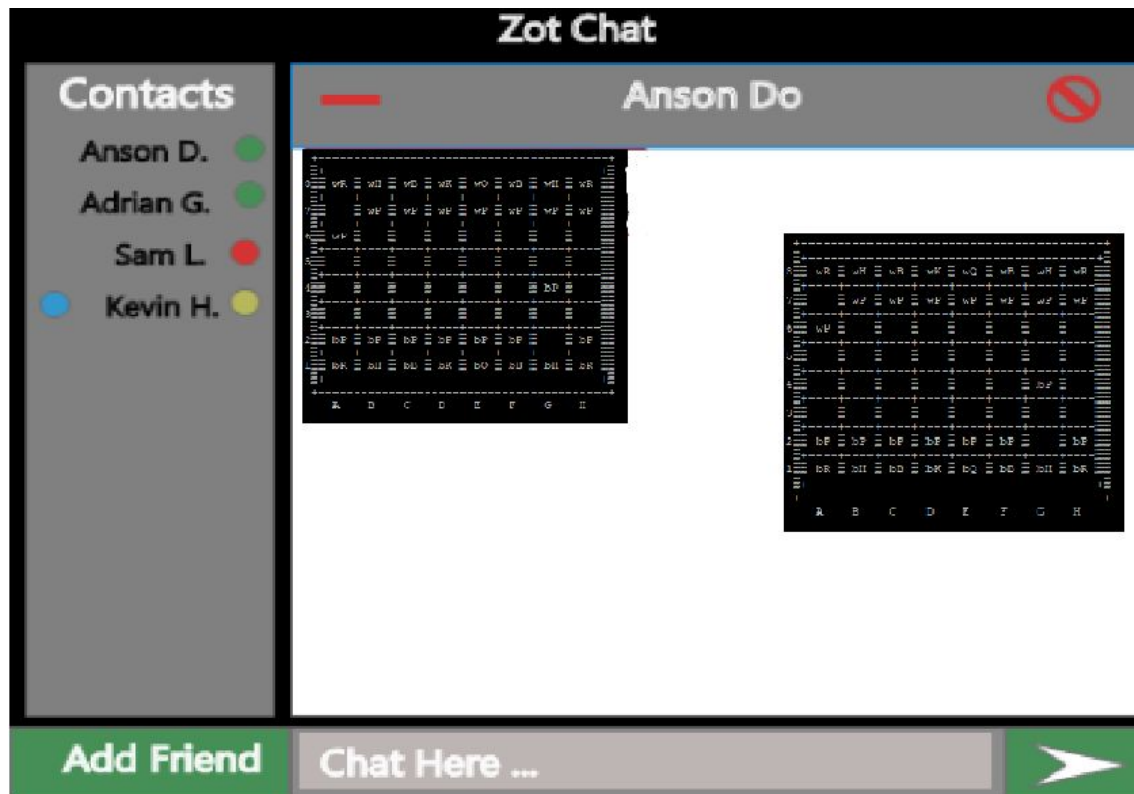

Step 2: A screen will direct you to either confirm or deny the block request. Once selected, it will either return you to the home screen or back to the chat if “no” is selected.

4. Chess Program Functions and Features

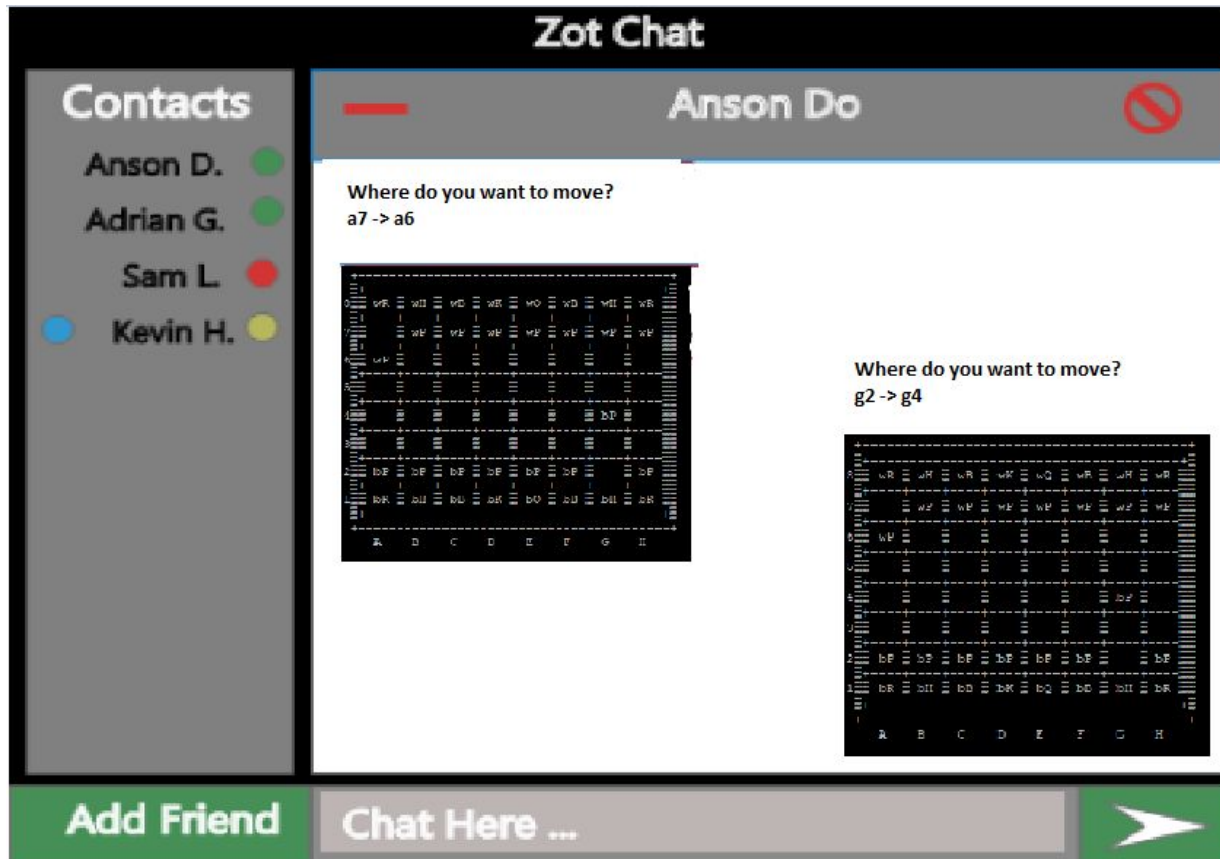

4.1 Integrated ASCII Chess Game in Chat

Integrated chess within the chat window, so each person will say their specified move (ie like a3 to a4) and the board will update through that person's chat window so the other person can see then the other player can do the same, while being able to chat.

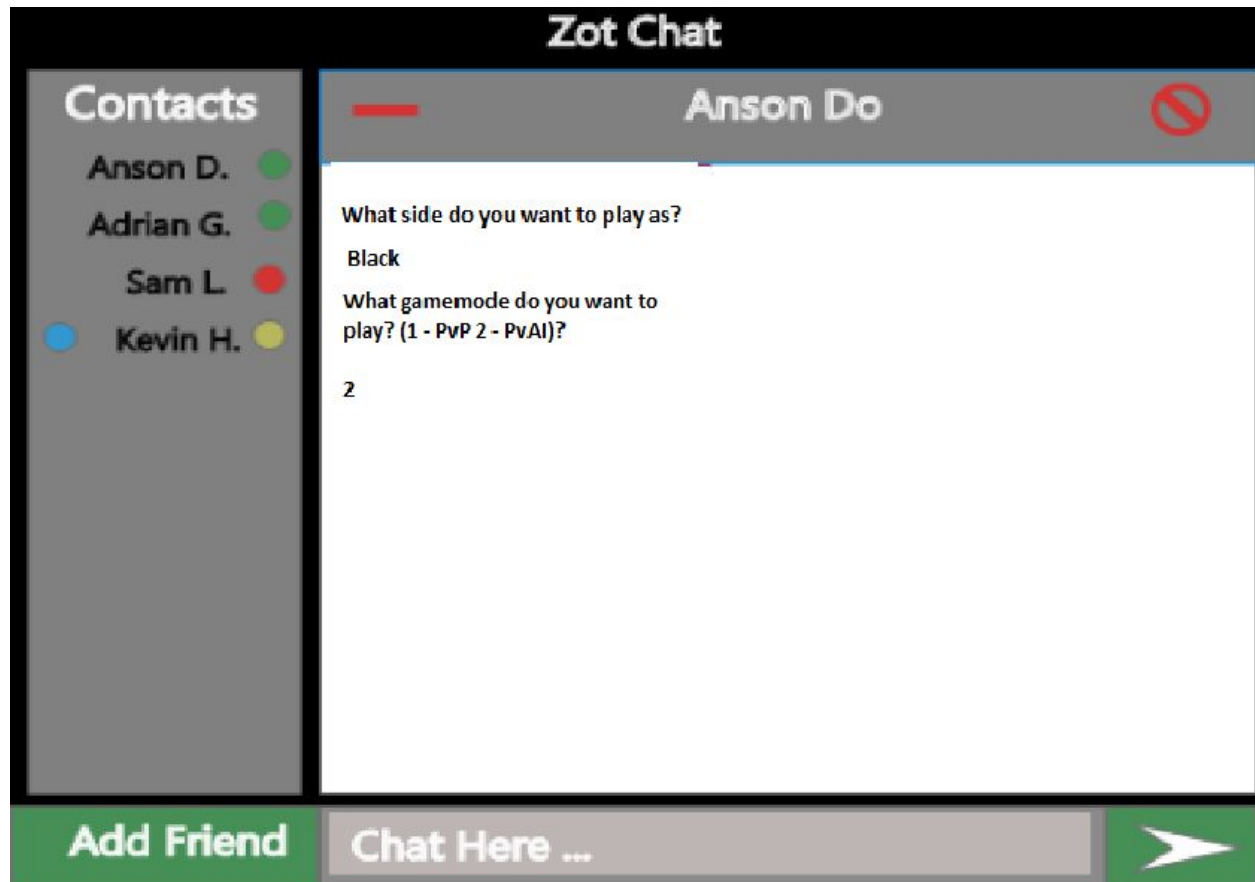

4.2 Text input for chess

The chess program will ask the user where they want to move and it will then ask the other player, it should tell the user if the move they wanted to move to is illegal and ask the player again to make another move.

4.3 Game Setup for chess

Simple game setup with text based inputs, this is for what side the player wants to play as and the gamemode.
